

Site Security

We understand that your site's security requirements may not be identical to other clients', which is why we tailor a security solution to suit your exact needs. In addition to providing you with a security presence, our SIA licensed security professionals can be trained on specific job requirements, such as alarm monitoring and keyholding services, or more commonplace, lobby reception services. Our personnel have the latest technology at their disposal - not only do we provide staffing, but we are also able to provide peace of mind with our detailed staff monitoring and security checkpoint systems which allow facilities managers to monitor our staff's actions in real time and also relay messages to our staff. Using this solution is perfect for clients with multiple buildings that don't offer 24/7 access, as overnight staffing numbers can be optimised.
