

## Dog Section

The newest addition to the professional security services we currently offer is our security Dog Section. Comprising a variety of breeds of dog with experienced handlers from various backgrounds including Military, Police and Civilian.

Our specialist security Dog Unit is headed up by an experienced dog handler who is SIA Licensed and registered and constantly monitored with the BIPDT. Both Steve and his dog are fully insured, giving you peace of mind that they can work in any given environment.

The Security Dog Section when deployed will maximise security at your premises or special event by enabling the handler to cover a large area more effectively, relying on the dog and its enhanced abilities of hearing and smell, which will allow it to detect intruders at a much greater distances as well as in hiding places that a lone security guard may overlook.

Areas we have deployed our Security Dog Units include building sites, stately homes, private homes and estates, hospitals, music concerts, sports grounds, demolition sites and TV and film sets.

The animals we use in our Dog Section are all highly trained to nationally recognised standards of quality and are at all times controlled fully by their handlers.

If you would like to benefit from a free security survey and detailed report on how our Dog Section could maximise the security at your property then please contact us here .
